Summary

Aspiring AI/ML engineer and B.Tech (CE-AIML) 3rd year student with practical experience developing AI-powered projects and working in Linux environments. Proficient in Python and modern development tools, with a focus on building efficient systems, clean code and integrating AI into real-world applications.

Experience

AI Trainee · [Edunet Foundation](#)

Remote · Dec 2025 - Jan 2026

- Completed a 6-week internship in Artificial Intelligence & Machine Learning with AICTE, implemented by Edunet Foundation.
- Gained hands-on exposure to core AI/ML concepts, model development, and applied learning during the training program.

Projects

Stocklytics AI | Retail Operations & Edge AI Platform

May 2026

github.com/Golixco/StocklyticsAI

- Developed a unified retail workspace for SMBs that integrates inventory management, billing, and analytics with a grounded AI assistant. It acts as an on-site business consultant, running 100% locally on Gemma 4-4B to keep sensitive store data private and offline.
- Tech: FastAPI, Next.js 15, Google Cloud (Run, BigQuery), Firestore, PyTorch, and Transformers for local model inference and vector embeddings.

GolixcoBot | RAG-Powered AI Digital Avatar

April 2026

rohansonubablani.com/golixcobot

- Architected a live RAG-driven digital avatar that serves as a personal knowledge base, capable of answering anything about my professional journey and personal life. Optimized the site performance using Cloudflare and managed visibility through Google Search Console for SEO.
- Tech: Google AI Studio API (Gemini), Vector Embeddings for grounding, Cloudflare for security/DNS, and Python for custom retrieval logic.
